CROP: Nursery

RATES:

2 quarts C-CAT per 100 gallons of water

GROWERS COMMENTS:

"On Jan 1, 2005 I treated my whole nursery with C-CAT at 2 quarts per 100 gal. The results have been tremendous. All stages have responded in no time. The color of the finished crops is outstanding. The younger transplants have produced a root and foliage flush that is incredible. This product has really improved the quality of my crops. My production times have been cut by at least 30%. I am impressed, and excited. I love what I am seeing. I plan to use it all year long."
