

GROWER: BRITAIN FARMS

LOCATION: FLORIDA

CROP: TOMATOES AND OTHER VEGETABLE CROPS

RESULTS: “I have been using the C-CAT for several years now. I am still seeing the same kind of results that I did when I first started using the C-CAT. The plants are more flush with foliage, better and bigger roots systems in all crops and healthier plant life overall. All these things result in more production and a better quality product for me to sell to my customers. I am very pleased with the C-CAT.” Horace Brittain
