

**GROWER: ROYAL C FARMS**

**CROP: TOMATOES**

**APPLICATION METHOD: Drip line and foliar spray applications where made throughout the year.**

**RATES: 2 qts per acre on each application**

**RESULTS:**

**Control: 2284 boxes per acre**  
**C-CAT: 3225.5 boxes per acre**

**GROWERS COMMENTS: Steven said "The C-Cat flat works, giving an extended picking life of at least 2 weeks. The quality stayed the same throughout the season from the start to the finish. No reduction in the quality at all. The green tomatoes at the top of the bush at the end of the season were sold as green tomatoes, before using C-Cat these were always flat sided and hollow. Now we can sell them as good quality fruit."**
