

GROWER: HAROLD McCLELLAND

LOCATION: ZOLFO SPRINGS, FLORIDA

CROP: CITRUS

RESULTS: “Since using C-CAT on the program, I have seen less deficiency in the trees, better color, and overall health improvement. Leaf minor has been less of a problem and we seem to have indications that it helps with Greening. The new growth that flushes has been healthier and there is an increase in production. But the real thing is the cost; it gives you the best bang for the buck! I recommend the program to any citrus grower. Feel free to call.” Harold McClelland 863-781-0105
