

GROWER: JERRY DAKIN DAIRY

LOCATION: MYAKKA CITY, FLORIDA

CROP: SORGHUM AND PASTURE

RESULTS:

“The improvement that has been noticeable in my operation is the overall health and vigor of our forges. I feel this is because of C-CAT’s ability to make nutrients more available to the crop. In turn, this allows the crop to have a higher protein count. I have been able to stretch my fertilizer program from every 24 days to every 36 days. The best sorghum crop I ever produced was this year using C-CAT. However, the main thing is, this year since we started using C-CAT our milk is definitely more flavorful.”
