**GROWER: RANDY PADGETT**

**LOCATION: ARCADIA, FLORIDA**

**CROP: HERMATHRIA GRASS**

**RESULTS:**

“The field below is a field of Hermathria grass that was cut for planting grass 54 days ago. An application of UAN 32% at 100 pounds per acre, one gallon of C-CAT and Liquid Tech All purpose adjuvant at 1 quart per 100 gallons of water, this was applied to half the field on the stubble 6 days after harvest. On the other half an application of 20-5-10 dry fertilizer at the rate of 300 lbs per acre was applied.

The results of the two different types of applications are very similar; however where the difference lies is in the cost per acre. The application of C-CAT, UAN and adjuvant costs was \$37.50 per acre and the application of 20-5-10 dry fertilizer costs was \$63.00 per acre a savings of **\$25.50 per acre.**” Randy Padgett 1-863-990-4982
