

**GROWER:** Terry Givens Farms

**CROP:** Soybeans

**APPLICATION METHOD:** Foliar sprayed C-CAT during the growing season

application: 3 quarts of C-Cat at early Bloom

**RESULTS:**

An average of over 50 bushels per acre on 1500 acres.

**GROWERS COMMENTS:**

"The best yields prior to using C-CAT was 40 bushels to the acre on an average over the 1500 acres. I had one field that yielded 69 plus bushels per acre." Terry Givens
