

GROWER: Martin Farms
Tim Smith

CROP: Soybeans

APPLICATION METHOD: Foliar sprayed C-CAT twice during the growing season

1st application: 2 quarts of C-Cat at Planting in Row
2nd application: 2 quarts of C-CAT at Mid-Bloom

RESULTS:

On the irrigated fields it yielded a **6** bushel increase.

GROWERS COMMENTS:

"I had a much faster and improved germination across the whole field, resulting in a uniform stand and maturity." Tim Smith
